Hammerlock Type Zinc Plated Cotter Pins

Insert

Insert as you would any ordinary cotter pin. Hob-Lok pins have specially tapered parallel shanks for quick insertion.

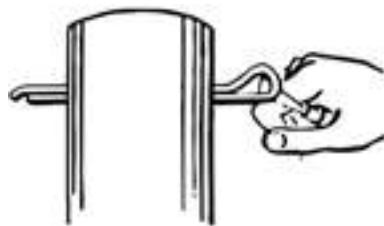

Hit with Hammer

Shanks Spread and Lock Themselves

When hammer hits head of Hob-Lok pin, it forces the shorter shank down over the curved end of the longer shank, thus causing the lower ends of the shanks to spread apart. This simple operation locks the pin securely in place. No twisting or spreading of the shanks is necessary. It is all done automatically!

Twist to Remove

To remove, insert any small tool in eye of Hob-Lok pin. Twist shorter shank to original position and remove.

15 Pcs.

The image features a variety of black plastic fasteners and retainers, including screws with different head shapes (hex, Torx, Phillips), bolts, and specialized clips. Some have serrated threads, while others have smooth or knurled surfaces. The items are scattered across the white background, with some appearing as faint, semi-transparent overlays behind the main text.

The image features a variety of door fasteners and hardware components scattered across the page. These include different types of screws, bolts, nuts, washers, and specialized fasteners like door hinges, door pulls, and door latches. The components are shown in various orientations and positions, creating a sense of a comprehensive product line. The central text 'Door Fasteners' is prominently displayed in a large, bold, black font, with the word 'Door' on the top line and 'Fasteners' on the bottom line. The background is plain white, which makes the metallic and plastic parts stand out clearly.
